

This is testimony to support HB-2021, the 100% Clean Energy for All Bill. It sets clear achievable for reducing Oregon's electricity grid emissions; will set clean energy standards for Oregon's electric utilities, and create good jobs in Oregon; creates investments and opportunities for community based renewable energy projects; minimizes environmental justice burdens; and ensures long term affordability and reliability.

We need this bill for our citizens, our communities and our climate. Please do all you can to pass it.
Thank-you.
Judy Wilder
