

OREGONIANS FOR
LIBERTY *IN* EDUCATION

Oregonians for Liberty in Education opposes HB 2954.

In 2015, the Oregon legislature passed SB 820 to allow public charter schools the option of using a weighted lottery. The law gave public charter schools the *option* of giving additional weight to students who are historically underserved. We believe a lottery system should not be weighted, but the choice should be left up to the individual school.
