

I support SB857 because it is getting out of control on the upper Willamette. I use a jet ski in that area and it is sometimes fun to try and jump the big wakes caused by these heavy boats, it is also dangerous. I see other boats getting water over their sides or bows all the time. And I see the bank eroding away. It's no joke. Jet skis and waverunners make basically no wake and they are a ton of fun. People just need to use the appropriate equipment and they can have fun without damaging the riverbank.
Please vote for SB857.
