

This bill unfairly excludes one user group from open access to a public waterway. The Willamette should remain open for all. There are rules in place that should be enforced along with more boater education. Excluding one user group in such a large area will drive these users to other areas creating safety issues in those areas. Please reject this bill and urge all parties involved to work together and come up with a solution that is inclusive of everyone.

Thank you,  
Kelly White
