

Rep. Nearman has not been convicted of any crime. The presumption of innocence until proven guilty is the founding principle of justice. It's a guaranteed right in this country.

An opposing party wants to silence a voice. One with a public forum, That is not guilt. There has been no conviction of anything. Are we now guilty of crimes untried in Oregon? This is a disgrace to our rule of law. It is only a matter of opinion. Of discrimination. It appears that in Oregon majority rule has resulted in tyranny. I' am furious at your disrespect for justice and for Rep. Nearman. There's no question we must remove from office those that violate our most sacred rights. The right for justice, of presumption of innocence is the founding stone.

How dare you say we are racist and discriminate. Without this founding rule of law no one is safe. Your no better than a pack of dogs
