

SB 16, Letter in Opposition

I'm appalled that this concept is even being considered!

Rezoning farmland to allow more houses that are not related to farming is fundamentally contrary to Oregon's land use program. This is a terrible precedent.

More than just a terrible precedent, it's opening up a foul can of worms that would have to be dealt with again and again -- like invasive weeds that take over; like misplaced operations that ruin the groundwater; like greedy/needy interlopers squatting.

Please kill SB 16!
