

Honorable Chair Barbara Smith Warner, Vice Chairs Drazen and Holvey and Committee Members,

Opposition HR 6

I oppose HR 6! Pitting Americans against each other is the goal of Communists for over a century and a half. Their goal is to get us to fight one another. They use race as a bases to accomplish this goal. They did this in other countries they conquered. They claim to be the champion of the oppressed but only use race as their tool to divide nations. They don't use their leadership to bring any benefit to the group or bring unity to the culture.

Dividing us by race and promoting one group over another is classic racism and will never lead us to unity.

We are one race, the human race.

Rather than declaring that racism is a public health crisis, and the oppressive tenants of Critical Race Theory be adopted, Try putting forward the Golden Rule: "Treat others the way you want to be treated." in our schools and communities which would go much further in bringing about real unity and respect in our culture.

Best Regards,
Janice Dysinger
