

In support of HB 2725, I would like to point out that boats above 5000 pounds that would be restricted on the upper Willamette, make up only 1% of the registered boats within 45 miles of the Newberg Pool. So....a whopping 99% of the boats within range of the Newberg Pool would be unaffected. All the testimony against this bill comes from the 1% that want to ruin the river at the expense of the other 99% who have to leave when big boats are present.
