

With this bill, requiring boats that are towing water sports like wakeboarding, and wake surfing to a small zone where that is the only place to do those activities is not smart. There are too many people wanting to wake surf and wake board and having a small designated spot is going to be too congested and cause accidents. Instead of having the freedom to wake surf and wakeboard where we please like inner tubing and water skiing can, it requires us to haul our boat to a significant amount of distance to reach the zone where we can wake surf and wake board. It is not a good use of the river, and is uncalled for.
