

My name is Diane Ware and I live in Medford, Oregon. As a Rogue Climate volunteer I worked connecting interested city of Talent residents with an Energy Trust of Oregon weatherization program. Manufactured home air leaks were discovered and sealed . I got to experience people's happiness over anticipating warmer and cooler homes and paying less money on their power bills.

I see the Healthy Homes bill as a way to spread this contentment throughout our state . As a former teacher and grandmother of 6 I am also enthusiastic about families feeling cared for as their homes are made safer and healthier and good paying jobs for adults are created in retrofitting. I am grateful for all that I have and hoping for an opportunity to work for and vote for the passage of this bill. Thank you for all you are doing !
