

I am a retired registered nurse. I worked at many different hospitals in my lifetime and I know all too well the tragedy of a for profit healthcare system. I was almost brought to tears many times seeing insurance companies and hospitals put profits over patients. Especially in the last couple decades. It is a crime when healthcare dollars don't go for healthcare but instead go towards obscene profits for insurance companies. We can do better and cheaper than the wasteful system we have now. We need a universal healthcare system similar to Medicare where folks can get the care they need without going bankrupt. All society will benefit when we all get the care we need. The cost for a Universal Healthcare system has been proven to be less or the same as what we are paying now without the heartbreak. Please pass SJR 12.

Thank-you for listening,
