

Background checks are what we decided to use as a way of knowing if an individual is criminally prohibited from using a firearm. It makes it useless if firearms are sold before the background check is completed. We have seen tragic events happen, such as in Charleston, when this is not followed. It makes complete sense to have a bill like this in place. It is simply a safety issue, and would benefit many, especially those who are in violent environments. I ask you for your support in passing through this bill. Thank you.
