

I believe the legislature writes bills just to make life hard for ordinary people. It also assumes that nobody is capable of making a good decision on their own without being told to by the government. Certainly, we, including businesses want a clean environment and can make informed decisions. I believe that the state of Oregon is trying to destroy all small businesses in our state. There has been a real assault on restaurants in particular and this stupid law will just hammer another nail into the restaurants of our state. When the legislature is finished, nobody will want to do business in this state. Our economy will crash and the people will be fleeing in great numbers, making property here worthless. Please vote no on this bill. I like this state, but it is only one of 50 for me to choose from and there are other nice places to live too. In fact, almost all of them have their restaurants open at this time.
