I am writing support SB43, the extension for the film tax credits.

I have worked in the Oregon Film industry for 25 years and have witnessed first hand the impact of film credits to the amount of production work in this State.

I also find it interesting that other States, such as Montana, purchase tourism ads on shows filmed in Oregon such as Grimm. These states spend more in advertising than Oregon pays in incentives and the exposure for the State is greater than one minute tourism ads.
