

I have already submitted testimony on this bill but want to add another point. Anyone 18 or over getting or renewing their driver's license will be automatically registered to vote. The majority of eligible voters who are not registered via Motor-Voter will be those who don't drive. These are the very same people who will find traveling to the county clerk's office difficult. Allowing them to register and vote simultaneously removes an obstacle from the path to equitable voting rules.

Thank you.
