

As a Combat Veteran I took an oath to support and defend the US Constitution from all enemies foreign and domestic.

Passing this bill would be a violation of the 2nd Amendment which states in the last sentence "shall not be infringed". Passing this bill in closed session where We The People are not allowed to attend is a blatant violation of our Oregon Constitution which would make this law void should it pass in closed session.

This bill would not stop crime, and would in fact create a victim rich environment for any criminal who chooses to create a violent crime on one of these gun free zones be the violence committed with a firearm, a Molotov Cocktail, a combination of readily available household cleaners that would make an explosive or chemical weapon. By taking the ability of self defense or the defense of others you would be personally responsible for any injury or death to any person in one of your victim rich gun free zones.

Any restrictions to our rights as citizens are unlawful as there are numerous federal laws that protect our rights which according to the Declaration of Independence and the Constitution of our nation are given to us by our creator and are innumerable.

You were elected and your salaries are paid for by We The People which makes you our employees.

I strongly object to this bill and any other bill that restricts ownership, transfer or sale of firearms amongst law abiding citizens.
