

I strongly support OFRI. OFRI provides valuable resources to K-12 students and teachers, statewide. OFRI funds the Talk About Trees (TAT) program. TAT provides free, science based, hands-on lessons to classrooms throughout Oregon, visiting with an average of 100,000 students each school year. OFRI also provides free busing for forest related field trips. Additionally OFRI funds ONREP. ONREP Provides free workshops to Oregon teachers. Losing OFRI funding would be detrimental to Oregon school children and their teachers.
