

First of all this law does nothing to help anyone! The thugs who use their weapons for harm will continue to do so because the laws we already have are not enforced for what ever reason. What I see is a bill that that makes law abiding, tax paying, work hard everyday citizens a felon for being able to carry to protect themselves and family against the very real threat of unlawful people who have no respect for the law to begin with. We as citizens expect the people whom we elect to use the laws that are already have on the books against the thugs and make them do the time they deserve for the crimes they commit!!
Quit making dumb ass excuse's and get to the real problems we face like getting people back to work.
This law does nothing for anybody except the person who wrote it up looking for notoriety!!
