

I oppose this due to this bill limiting the rights that all citizens of the united states are given. This is a bill that will limit the access to places that people like myself can go having a background in private security, law enforcement and military this bill limits the places I could go if on a protection detail or on my off time . Not too mention that criminals don't obey laws or signs (this is one of the reasons why they are criminals) when a person is carrying concealed he or she can stop a threat or protect themselves from harm. which is one of the main reasons why I chose to get my concealed carry license. in some areas (portland) where this has been tried the facts speak for themselves after the bill was approved crime went up. Gun violence has increased due to gangs and criminals not caring about laws. So basically you take the ability of people to defend themselves and you have cut police budgets and expect the bad guys to just stop and yes I do think that this will not be read by anyone who is at this bills level.
