

I Deanne Hopson oppose this bill. For many women conceal carry is our only way of protecting ourselves, and the government should not be taking away our right to do so! Many women can not openly carry because that would lead to more women getting victimized from people just wanting to take their weapons. The bill you are trying to pass is not in the best interest of citizens, and I urge you to think about how many lives you'd actually endanger by passing this bill.
