

I am against this bill. We in Oregon have been fortunate to have a Governor that took action even while our local and national Republicans opposed it. Oregon, and as a consequence, has been impacted less than most other states. We have more infectious Covid strains spreading though out the US, and now is not the time to reduce restrictions.

Yes, I understand businesses have been impacted, but to we want to be impacted, or dead? In a few months, we should have herd immunity from the vaccines, so let's just stick it out a little longer. If you want to blame someone, blame President Trump. His failure to respond to the Covid-19 Virus has resulted, so far, in 511,133 deaths (21 February 2021), more than World War I, World War II, the Korean War and the Vietnam War combined. The US has 4.26% of the World's Population and 20.8% of the World's Covid-19 deaths.
