

I support this bill as the actions of the governor have destroyed peoples lively hoods by not allowing them to operate their business. Throughout the pandemic the measure of what can be open and not was what was essential. All businesses are essential. They all provide for an individual or family. To even require a bill to restrict the governors ability to close businesses seems un-American. Life, Liberty, and the Pursuit of Happiness is what this county is founded on and to have the government take that right away, is unconstitutional. There should be repercussions for the restrictions that have been imposed that impeded on this right. Every business needs to be open at 100% capacity today. They will do whatever it takes to keep people safe and feel safe to patronize their business. It's beyond time to lift restrictions that have been imposed.
