

Once again the Republican party tries to circumvent the Power Of Duly Elected Officials. The Republicans have proven time and time again that their only real concern is their own wealth and greed. The reason this economic downturn has continued as long as it has is because of the choices by Republicans and their supporters to not take the pandemic seriously and fought tooth and nail to oppose even the simple task of wearing a mask. How childish to politicize the health of the people in our cities, state and country. Now they try to pin the economic downturn on the Governor? This is disgraceful. The Republicans completely ignore their actions and words that have prolonged this problem. The blame for the prolonged closures and loss of income lies solely at their feet.
