

I oppose this bill. It will not stop any of the activities that the proponents are describing. School children will still have to go through safety drills for active shooter events since this law will do nothing to stop active shooters from entering schools with a gun if they choose to. My wife is a recently retired elementary school principal and confirms this statement. The Washington County commissioner neglected to include the FBI background check required for a concealed handgun permit (not required for a library card). Please work on and pass laws that will actually make a difference. Put in the effort. This is an easy feel good law that will accomplish nothing except to make citizens who are otherwise honest and law abiding into unintentionally law breakers.

Thank you.
