

Hello, If your goal is to have us all not carry protection, this would do it. This is not only unconstitutional, we need to be allowed to vote on something life changing like this. this would put a lot of the population at risk, unable to defend themselves when they are out and away from their homes. The police have been called off, they do not respond, and if they are able, the crime would be done and over by the time they get there. There is no sense in this at all. If you are worried about shootings, it is NOT law abiding citizens that are causing problems, those criminals will either continue to come out more and more knowing there is no threat to them, or use other weapons. I saw a perfect meme to describe this the other day on facebook, to stop drunk drivers from killing sober drivers, take the sober drivers off the road. This bill is just like that. you need us who have gone through a back ground check, know how to handle a fire arm against anyone that might turn up and go after innocent people.
