

As a third generation Oregonian, and lover of the united States constitution - I oppose this bill.
Enforce the gun laws you already have subjected the people to.

This is another bill that only makes us less safe in public, as criminals clearly don't care about gun free zones and the like. This will only serve to punish the law abiding firearm owner who might be the only chance for help in an emergency situation.
How long were 911 calls to the police delayed in your area?

How does this make us* safer?

(*we the people is defined as: Common folk forced to live amongst antifa and a failing mental health system, delayed police response time, within a lockdown society.)

Until then this is nothing but more infringement on our constitutional right.

I would strongly encourage that while this unrest in our society is happening, the good people hearing this message will realize that now is not the time to appear to add more evidence that Oregon government is riddled with power hungry would be dictators ruling over the little people.

Cause if you haven't noticed, Oregon is a mess.

I oppose this bill strongly.
