

In support of SB 14

Recycling anything can be tricky. Recycling plastic is guessing game. "Can this be recycled? It has a triangle..."

The rules for plastic recycling in Portland, and other areas, are extremely vague and appear to be constantly changing. The recyclers complain that they receive inappropriate material to be recycled, yet they don't help us learn what's ok to include in the recycling bin and what isn't. It's a guessing game. We encourage the recyclers to communicate with residents, often.

Please pass laws to discourage the use of plastic in packaging, and to help the recyclers increase the percentage of plastic that is able to be successfully recycled.

Thank you,  
Judith and Joe Huck  
Portland
