

Sorry this was not submitted prior to the hearing.

I support all measures that would expand options for emergency shelters. We are in crisis and as many alternatives as possible should be available for our houseless neighbors.

I also support expanding siting for car and RV camping and wonder if you have heard of this program: Safe Parking LA [Los Angeles]

"...a night-time program for people who are experiencing homelessness and sleeping in their vehicles at night, providing a safe and stable place to park the vehicle, remain compliant with local laws, and have access to restroom facilities"

<https://www.safeparkingla.org/>

Thank you for your work.
