

The negative consequences to my health, being unable to go to my local fitness center, have far outweighed any health consequences that would have come from any Flu. As an adult citizen, I feel I should be able to weigh my own risk factors... just like people who choose to continue smoking cigarettes through this whole debacle. Fitness centers and other businesses should be allowed to stay open and operational - if people want to patronize them. Please end the Executive order madness.
Thank you.

Eric Hill
