

I would encourage anyone who thinks it is a privilege to harvest timber on private land to join us when we are trying to thin our small acreage or harvest any timber what so ever.  
You have no idea how much it takes to preserve our way of life, you don't pay our taxes, work our land, fight forest fires when they happen or anything else related to our property.  
It costs a lot of money to keep a place running, another tax during this time is plain wrong.
