

Dear Sir/Ma'am, I'm writing to respectfully support the adoption of this joint resolution urging our Federal Congress to enact bipartisan climate legislation. The impacts of a warming planet can not be underestimated and dramatic action is needed now. As noted by Bill Gates on a recent 60 minutes interview, putting a price on carbon is one of the top 2 critical actions that will lead to the innovation required to decarbonize the US and ultimately global economy. As a reminder, Oregon lost 1 million acres to forest fires last year and CA lost 3 million. That's 4 million out of a total 100 million existing between the 2 states... at that rate we will have destroyed our forests in a mere 25 years... this prospect is unthinkable and unacceptable. Please take this small action to express the urgency and appropriate 1st step addressing to righting our planet. Warmest regards.
