

I am find it hard to afford my physical energy with income and prescriptions. I would like to know more about what this meeting is about. I have plenty to offer I think we are doing a fine job all my bills are taken care of and my family's as well. But I do need to look out for my parent's energy and environment of both of ours as I will have to get a job to pay for a car to get to my aging and ailing mother of 60 yo that is more like 80 being rid to her bed like a milking cow and I am soon falling her ways and means to justify her own choices that turn out to be her will being removed from her by a ministry of military federal governments aided by the states. i would like to be spending my energy in education that is informal i could use some help creating displain of a curriculum out of my choice of commers. but for now i may have to buy a 600\$ vehicle which is more than a months income for myself and my mother put together to get me from Corvallis to Salem without a license three times a week four hours a day for medical needs and personal assistance,
