

Hey Dave this is Tony Jakacky. I wish you the best on this one. Our Governor's pedestrian understanding of economics is shocking. The restaurant industry is reeling but that's the tip of the iceberg. The list of people that go down with the restaurants is long. Just a few of which are employees, vendors, landlord's. There's a small restaurant in my commercial building in G B. For ten years they have made improvements each year. Not this year. They were never behind on the rent. Not this year. Governor's policy's has left operators with pride in their business to become beggars. In this case Governor's policy has left the restaurant's future up to my good will. Not all who have rentals can survive without the income. I can and will. But most can only go so far down then they go down also. Thanks for what you do and for listening. It's a little disingenuous to have people who never miss a paycheck tell me how to or not to work. Thanks Tony
