

The business I own and run for 12 years has been decimated by Kate Browns sweeping and uncensored lockdowns. We have had zero transmission, not one employee has been infected, and we have not had a client report infection. We have followed cleaning, clearance and and entry guidelines. Safety is the priority, but we are treated as if we are the source of spread. Closing restaurants and gyms sends a message that nothing is safe and people give up and stay home.

We need to help people understand that living with this is key. Kate should talk and meet with the businesses prior to closure, she should meet with the people that run the business, rather than ignore their cry for help and relief.

My business was thriving and now we are at 30% sales of year priori month over month.
Open pur businesses, we can do it safely, we are not spreaders, and we can help people return to normalcy !
