

Hello, my name is Brandon Singleterry and I am the owner and operator of Anytime Fitness-Woodburn. I have been in business nearly 14 years. Over the last 12 months I have lost close to 100k due to the covid restriction put in place by the government. I have had to close half of the gym to save on rent I have only received about 9k in assistance and am now applying for PPP, again. I would like the government to explain its reasoning for the lockdown as I have yet to find any mass spreader events at fitness facilities anywhere. I demand they show us data that supports their position. Im sure they are well aware of the damage to peoples physical and mental health by being shut off from physical activity. Are they doing the right thing by the people? I believe they are not.
