

I live in Brookings, Oregon and am appalled at how this Governor and this state's Oregon Health Authority have devastated businesses in Curry County. Between mask mandates, limited seating capacity in restaurants, limited capacity in gyms and movie theatres they are ruining people's lives down here. Everything I like to do is being taken away from me all in the name of "safety". What good is "safety" if people cannot earn a living? What good is "safety" if healthy people are locked down??

Please exercise some common sense and stop this madness!!
