

I support this Bill 100%. This past year has been hard on several families I know economically and mental health wise too. I retired as a small business owner, the pressure to comply with all the requirements as a daycare provider was too much for my family and I. While I was looking forward to retiring, this is not how I pictured it at all. The lack of letting us socialize, eat out and share a meal with friends and family has hurt not only myself but my husband too. I also have health issues that requires me to be active and work out. I was looking forward to rejoining a gym and working out with friends new and old. This has been taken away from me also. This hurts not only me physically but mentally too. I believe that gyms, restaurants were unjustly closed down. I have been in big box stores and membership stores that people are stacked on top of each other. Why is that okay, but small business are not allowed to be open? If it is truly was concern of exposure then the big box stores and membership stores should be shut down too!

What about the rights of us citizens? Our liberties in pursuit of happiness? What has happened is tyranny and should be stopped. We the People have rights, and what was to be a 2 week closures to slow the curve is now almost a year. What a bunch of garbage, it is tyranny and control. I pray to God that we wake up and stop this from continuing.
