

The House Agriculture and Natural Resource Committee, really need to leave "Good enough alone"!! We don't need more taxing. We need to go back to the old ways of logging like we did 30 plus years ago. We need someone in this office that Knows how to manage the forests correctly. The logging, clear cutting, replanting!!! Get some real loggers in this office than can and know how to run things better than the fools that are in there now, that only want to increase taxes on Everyone. Tax doesn't fix things it creates more problems and higher prices and gives those fools fatter pockets in there pants.
