

Please pass HB 2357 and eliminate the OFRI.

The OFRI has promoted the industry viewpoint and wasted public funding; we want transparency of public funding and independent, science-based curriculum in schools.

Funding for outdoor education should not go through the OFRI.

The OFRI has illegally lobbied against climate smart logging; we want to support forest management based on science and to eliminate clear-cutting/road building in forests.

Please support HB 2357 and support science.
