

I support this bill because our businesses and economy has been ruined enough already because of the governors restrictions. It's time for that to end. Business owners have the right to be open and operating per the agreements that they signed up for to operate their business. The governor has allowed establishments with lottery machines to open up solely for use of lottery, not for customers to eat and drink. What benefit is that to the business? None! The business still has to pay the full operation cost for these lottery machines which benefit the states agenda, but does not support the operation of the business. This proves to me that the governor does not care about what is best for small businesses, but what will make her state money. People cannot survive on more handouts from the government. They need to be able to open and operate their business as they have been permitted to do. Businesses are still required to pay taxes and fees to the state throughout all this. How can that be when they aren't allowed to operate as normal.
