

Please support SJM5, which urges Congress to enact bipartisan climate change legislation.

While in this era of outrage and antagonism it is hard to fathom effective bipartisanship on any issue in this State, it is nonetheless time for all people to come together to act to protect, preserve and recover whatever we can for future generations, and our own. As the impacts of climate chaos continue to demonstrate (think OR wildfires, ice storms, winds, droughts, algae blooms, etc) no one who is willing to listen to science can deny this is an emergency which demands cooperation and courageous action.

Do it.

Thanks.
