

I support SB 574

We need this for a variety of reason.

First, we have too many cars on the road with single drivers. It's contesting our roads, we have limited parking and too much traffic as a result.

Second, I am constantly need to look over my shoulder and behind me (which I should do anyway) for Cars and SUV's tailgating me. It's awful and dangerous for a motorcycles. As a result I do get upset and quickly try to find a space and wave them ahead. Honestly, those drivers should not be on the road anyway.

Third, I have lived all around the world. This is normal everywhere. And people adapt and switch to motorcycles as a result.

Fourth, people are doing this illegally, riding between cars, riding on the right side of the road, which is far more dangerous anyway. Let's just make it legal so people do it right

Thank you
