

I support SB 574.

There are many reason to allow motorcyclists to filter forward during traffic slow-downs, and the major reason is safety. An all-too-common accident is when a driver fails to see traffic is stoppped ahead and plows into stopped cars/trucks. Allowing motorcyclists to filter forward gets them OUT of that equation and will save a zillion dollars in hospital bills, physical therapy, lost working hours, etc.

Do the right thing, and allow motorcyclists to filter forward.

\*It works well is most of the rest of the world.
