

As a 20 year Oregon resident, and 53 year old former resident and motorcycle rider in the state of California, I know first hand the benefits of Motorcycle Lane Sharing.

- Significantly reduced traffic congestion and more efficient traffic flow
- Reduced fuel consumption and pollution from idling, non-moving vehicles
- Increased rider safety thru positioning between lanes, not between bumpers
- Decreased rider fatigue in warm weather (primary times of motorcycle use)

Please join us in supporting SB574 in favor of Motorcycle Lane Sharing in the State of Oregon. It's the right thing to do.
