

To whom it may concern;

Thank you for taking the time to receive testimony on this issue. As a long-time motorcycle rider, safe and effective use of lane splitting, or filtering, can exponentially reduce the chances of being crushed between two larger vehicles, both at stop lights/signs and in traffic. The other concern is raising public awareness about motorcycle riders and the laws that pertain to them.

Lane filtering reduces traffic, reduces commute times, and increases safety, and should be implemented.
