

I am writing to strongly urge your committee to fully fund measure 110. As an addiction professional for almost 30 years, I have witnessed the harm that an unfunded addiction system has caused to individuals, families, and the community. We need all of the elements that were included in 110 to be fully funded and implemented immediately. There is no one road map that can take us from addiction to recovery but by using harm reduction as the foundational support for addiction treatment, measure 110 puts our state in the right direction. The current overdose crisis that the state is in requires action. Please follow the mandate of the voters and fully fund 110. Thank You Larry Weinerman
