

I am a motorcycle commuter in Portland. I support SB 574 and hope you will too in order to promote more efficient transportation and motorcyclist safety.

Its one small step to save lives and save the planet!

-Lane sharing reduces congestion (increases total road capacity for \$0)

-Lane sharing reduces emission (reduces total commute time and incentivizes driving fuel efficient motorcycles & scooters)

-Lane sharing reduces accident severity (studies show that although accident rates are similar, the severity of accidents drops dramatically!).

Motorcycles are not cars. They don't have crumple zone. The safety of a motorcycle relies on its maneuverability. SB 574 gives safety back to motorcycles. Let us get out of the way!
