

I am in total support of this issue and have safely used the lane sharing system in California hundreds of times and the safely issue is also needed when high temperatures are high and traffic is stopped or stagnant for a extended period of time! I have only had close calls regarding being rear ended while stopped by traffic!. But I personally know several people personally that have been hit from behind when they were stopped in traffic and not allowed to filter to the light between the protection of vehicles. The most important thing going forward is drivers awareness of the law. And education for all involved! Please find the way to make this a success for all traffic needs as the benefits for all outweigh the concept of motorcycle riders taking advantage of this. The safely alone is a valid reason for passage. But it does honestly allow traffic to be more efficient when motorcycles can both lane share and filter at traffic signals. Thank you for the opportunity to speak to this important issue for all who are sharing the roads. Marty
