

Please refer to the constitution regarding sovereignty. Also, it is unethical and unconstitutional to mandate a pharmaceutical drug in order to get a job in our country. Not to mention, all covid vaccines are EXPERIMENTAL. Will you be responsible for all the medical bills and emotional effects for the rest of someone's life if they suffer an adverse event after getting the vaccine for a job? Please vote no on this unethical & unconstitutional bill. Nobody truly wants this as a precursor to making a living.
