

I respectfully request your support of SB574. I have ridden motorcycles for 20 years and love it, but have always admired how California can do lane filtering but we can't. I have several motorcycles and a couple are old Hondas that are air cooled and when you sit in traffic, they overheat. It means I can't ride them to work at all when above 75 degrees and chance of traffic. I would really appreciate the ability to slowly and respectfully move between cars stuck in traffic. Thank you, John
